WHO AM I?

So, a little about myself. I started in IT with a bit of luck. During my studies, I noticed it wasn't really for me, so I decided to take a break year. During this time, I started at Cofano as a qa engineer and quickly cultivated an extreme interest in the world of coding. Following that, I started learning about web development and automated testing. Since then, this has been a major hobby of mine, and I still find pleasure in learning about new stuff.

EXPERIENCE

7/2020 - current	Qa engineer While working at Dialog, I have been responsible for the entire QA flow. This consists primarily of manually testing new features as well as creating and maintaining automated E2E tests in Cypress. Apart from this, a big part of my role is making sure our development process is set up so that we produce the highest quality software possible. Cypress / Typescript / Zephyr / Github Actions	Dialog B.V.
2017 - 3/2020	Qa engineer During my time working at Cofano I was responsible for the functional testing of our products. Creating an automated testing suite in Puppeteer, improving unit test stability using mockito and JUnit. Load testing with Gatling and Performing periodic acceptance tests (drafting test scripts, performing tests, processing results) Javascript / Puppeteer / java / Linux	Cofano
2016 - 2017 part time	Promotion employee Providing information to the public for companies. PHP / Laravel	Allganzed

EDUCATION

2016 - 2017	Bachelors in chemistry (Not finished)	Hoge school Rotterdam
-------------	---	-----------------------

LANGUAGES

Dutch - native
English - fluent

HOBBIES

I am a big sucker for learning about anything even remotely interesting, from biology to technology to cultural stuff. Apart from that, my biggest interests are drawing and painting.
